CRITICAL CARE ULTRASOUND COURSE

Join this comprehensive ultrasound course and gain practical skills in ultrasound image acquisition and interpretation in the critical care setting. Learn fundamental and advanced ultrasound techniques including cardiac output, left/right ventricular function, FATE examination, and vascular ultrasound. This hands-on training with state-of-the-art equipment under expert supervision simulates critical cases to enhance your problem-solving abilities. Led by expert instructors, this course will increase patient outcomes and enhance your professional profile. Don't miss out on the opportunity to network with peers and experts in the field. Enroll today! [Click here!](#)

Deadline to register: 3/31/2024

*Attendees will need to complete required pre-work for the course prior to attending the skills station. Once registered, a link will be sent from SCCM for the modules.

Course Director: Krishna Aparanji, MD, FCCM
