
Name: Michael A. Rudoni, Pharm.D., BCPS, BCCCP

Personal Statement:

It is with great pride that I serve as a member of the Society of Critical Care Medicine and the Ohio Chapter. The commitment to science, discovery, and innovation demonstrates the dedication of the Society, and all of its members, to fulfilling the mission of *securing the highest quality care for all critically ill and injured patients*. By practicing critical care—or any other field of healthcare—we have accepted the responsibility to remain informed, think critically, and ask questions about issues that are most dear to all of us. SCCM’s network of providers and educators has created a platform which allows us to challenge each other to advance our understanding of science and medicine and to share information essential for improving the outcomes of those in our care.

The ability to connect and collaborate with people around the world is remarkable, but I believe the resources here in Ohio must not be overlooked. I feel fortunate to be able to practice in an area of the country that has made, and continues to make, countless contributions from so many disciplines and professions. As part of my responsibility to support the field of critical care, I have invested in the education of caregivers, both experienced and in training. I am grateful to have had the opportunity to serve as director of a critical care pharmacy residency program, as chair of this Chapter’s Education Committee, and, most recently, on the SCCM Post Graduate and Fellowship Education Committee.

As I conclude my term as Member-at-Large, I remain eager to help our leaders within the Ohio Chapter maintain the momentum we have created these past several years. Despite a devastating global pandemic and the impact it has had on those in healthcare, our members have proven to be the epitome of resiliency. Their ingenuity and resolution make the Ohio Chapter stand out as an invaluable source for multi-professional education and networking. As an active leader within the Chapter, I will be committed to my role in order to ensure local representation of Critical Care Medicine continues to grow.
