### Credits

This live activity, Carolinas/Virginias Chapter, Society of Critical Care Medicine, 42nd Annual Scientific Symposium, with a beginning date of 6/13/2024 has been reviewed and is acceptable for up to prescribed credit(s) by the American Academy of Family Physicians. Physicians should claim only the credit commensurate with the extent of their participation in the activity. \*\*\*CME applied for\*\*\*

ACPE is granted by Campbell University, College of Pharmacy.

## Planning Committee

Kristie A. Hertel, RN, MSN, CCRN, ACNP-BC, FCCM President, Carolinas/VA Chapter, SCCM Advanced Practice Provider, Trauma and Surgical Critical Care East Carolina University Health Medical Center Greenville. NC

Lesly V. Jurado Hernández, PharmD, BCPS, BCCCP, BCNSP, FCCM **Education Committee Chair** Surgical Trauma ICU Critical Care Pharmacist Nutrition Support Pharmacist Novant Health New Hanover Regional Medical Center Wilmington, NC

Elizabeth Anne Farrington, PharmD, FCCP, FCCM, FPPA, BCPS, BCPPS, BCNSP Clinical Pharmacist - Pediatrics Novant Health New Hanover Regional Medical Center Wilmington, NC

Erin Ledford, PharmD, BCCCP, BCCP Cardiology Critical Care Clinical Specialist Director, PGY2 Critical Care WakeMed Health and Hospitals Raleigh, NC

Carrie L. Griffiths, PharmD, BCCCP, FCCM Clinical Pharmacist Practitioner—Emergency Medicine Salisbury Veterans Affairs Medical Center Salisbury, NC

**Cherry Strickland** Administrative Assistant, Carolinas/VA Chapter, SCCM Program Coordinator, Trauma Services Atrium Health-Carolinas Medical Center Charlotte, NC

Jenna Foster Cox, PharmD, BCPS, BCCCP President Elect, Carolinas/VA Chapter, SCCM Clinical Pharmacist Specialist - CPICU PGY2 Critical Care Residency Program Director Prisma Health Richland Hospital Columbia, SC

Saptarshi Biswas MD, FRCS, FACS, FICS, FCCM Attending Surgeon, Department of Trauma, Acute Care Surgery and Surgical Critical Care Associate Program Director, General Surgery Residency Grand Strand Medical Center Myrtle Beach, SC

# Pharmacology Course Thursday, June 13, 2024

1:00-1:05pm	Welcome/Opening Remarks	Lesly V. Jurado Hernández, PharmD, BCPS, BCCCP, BCNSP, FCCM Education Committee Chair Surgical Trauma ICU Critical Care Pharmacist Nutrition Support Pharmacist Novant Health New Hanover Regional Medical Center Wilmington, NC
1:05:1:50pm	The Pressure is On! A Guide to Titrating Vasopressors	Katie Maddox, PharmD, MPH PGY-2 Critical Care Pharmacy Resident Novant Health New Hanover Regional Medical Center Wilmington, NC
1:50-2:35pm	Deadly Doses for Depression: Antidepressant Toxicity in the ICU	Anna Dulaney, PharmD, DABAT, CPP, FAACT Clinical Toxicologist Assistant Program Director, Medical Toxicology Fellowship Atrium Health, Carolinas Medical Center Charlotte, NC
2:35-2:50pm	Break	
2:50-3:35pm	Salty vs. Sweet: A Pro-Con Debate of Hyperosmolar Therapy	Brandon Smith, PharmD Kelsey Furtick, PharmD PGY-2 Critical Care Pharmacy Residents Prisma Health Richland-University of South Carolina Columbia, SC
3:35-4:20pm	Acute Management of Cardiac Dysrhythmias	<b>Dylan Wagoner, PharmD</b> PGY-2 Emergency Medicine Pharmacy Resident Atrium Health Cabarrus Concord, NC
4:20-5:05pm	Something Old, Something New, Something Blue	<b>Kathryn Albert, PharmD</b> Critical Care Pharmacist Novant Health New Hanover Regional Medical Center Wilmington, NC
5:05pm	Closing Remarks	

### Objectives

- Identify mechanisms of commonly used vasopressors
- Choose the most appropriate second line vasopressor
- Identify a patient for which weaning vasopressors is appropriate
- Identify which antidepressants are most likely to produce significant toxicity in overdose
- Describe signs and symptoms of acute toxicity associated with select antidepressant medications
- Discuss management of antidepressant toxicity in the intensive care unit
- Review the background and causes of elevated intracranial pressure (ICP)
- Describe the rationale behind the use of hyperosmolar therapy
- Evaluate the evidence to compare hyperosmolar agents
- Differentiate between the different most common cardiac dysrhythmias
- Summarize pharmacologic treatment options for cardiac dysrhythmias, including their dosing and adverse effect profiles
- Design patient-specific treatment plans utilizing pharmacologic principles and current primary literature
- Analyze the appropriateness of probiotic use in critically ill patients
- Review use of terlipressin for management of hepatorenal syndrome
- Evaluate utility of early initiation of methylene blue in septic shock

### Carolinas/Virginias Chapter, SCCM 42nd Annual Scientific Symposium Friday, June 14, 2024

8:00-8:45am   Keynote Address: Transitions of Care into the ICU – Trials and Tribulations   Jose L. Pascual, MD, PhD, FRCS(C), FACS, NCC (UCNS), FCCM Trauma, Emergency Surgery, Surgical & NeuroCitical Care President School of Medicine at the University of Pernsylvania (AAS Dysfunction in Vasodilatory Shook     8:45-9:30am   The Evolution of Angiotensin II and RAAS Dysfunction in Vasodilatory Shook   Ashish K, Khanna MD, MS, FCCP, FASA, FCCM Department of Anesthesidogy, Critical Care Medicine Atrium Health, Wake Forest Baptist Medical Center Wake Forest Shool of Medicine Atrium Health, Wake Forest Baptist Medical Center Clinical Pharmacy Specialist – MICU Lexengton Medical Center Clinical StewardShip     11:0-1:205m   Fluid Overload, De-Resuscitation, and Outcomes in Critically III Patients: The Relevance of Fluid StewardShip   Saptarshi Biswas, MD, FRCS, FACS, FICS, FCCM Trauma, Acute Care Surgery, Surgical Critical Care Concurrent Session 1 (Choose One)     0: StewardShip   B. presentation

Both days

# Target Audience

Physicians, pharmacists, nurses, and other healthcare professionals involved with the care of critically ill patients. Respiratory therapists may also benefit from this educational activity and are welcome to attend.

# Objectives

- Differentiate the role of surgery versus anesthesia versus ICU in patient handoffs
- Describe the impact of effective communication on a multidisciplinary and multiprofessional handoff
- Recognize the importance of handoff choreography in reducing preventable adverse events in healthcare Define RAAS pathways in septic shock
- Describe the evolution of exogenous Angiotensin II as a vasopressor
- Predict future areas of research and development in RAAS modulation with Angiotensin II
- Review evidence for corticosteroid utilization for pneumonia (PNA) treatment
- Examine data on use of corticosteroids in acute respiratory distress syndrome (ARDS)
- Identify optimal patient and agent selection for corticosteroid administration in PNA and ARDS
- Characterize current practices in fluid administration
- Identify risk factors for positive fluid balance and describe the importance of de-resuscitation
- Examine the relationship of fluid balance, de-resuscitation measures, and outcomes
- Define abdominal compartment syndrome
- Discuss treatment of abdominal compart syndrome
- Examine management of the open abdomen
- Discuss the rationale for the utilization of steroids in sepsis
- Discuss the evidence for the utilization steroids in sepsis
- Discuss the benefits and potential side effects of steroid administration
- Understand current immunosuppressive agents (MOA, adverse effects, dosing)
- Review clinical pearls related to each agent
- Discuss various complications of immunosuppression presentation
- Review components of thromboelastography systems and how coagulopathy is assessed compared to conventional testing Compare TEG 5000 system to TEG 6s system and review differences in testing
- Demonstrate proposed algorithms for utilization
- Review case examples for utilization of TEG in management of critically ill patients
- Explain the advantages and limitations of point of care ultrasound evaluation in the unstable patient
- Identify the sonographic findings associated with various causes of shock
- Describe how ultrasound can guide and confirm critical procedures
- Identify select injuries unique to coastal regions and describe treatment options
- Apply concepts to patient cases to design safe and effective treatment regimens for aquatic traumas, bites, and stings Evaluate emergent cases for pertinent information necessary to guide the treatment of injuries covered throughout
- Define fevers due to infectious and non-infectious causes
- Evaluate targeted workup of fever
- Discuss management strategies of fever
